## **KPI-OPEN Olympiad is the biggest in Ukraine and one of the biggest in the on-site programming Olympiads in the World**

With eleven years of sustainable development starting from 2006, [KPI-OPEN](#) Olympiad became one of the key events not only for young programmers from Ukraine, CIS and whole Europe, but also for the numerous Ukrainian and international IT companies. The main objectives of this contest are: drawing society's attention to intellectual competitions among students, promoting of self-development and teamwork, improving professional knowledge level of young specialists, developing communication between educational institutions, as well as establishing personal contacts between students from different cities and countries.

Meanwhile IT companies, which take part in the contest organization, get a great chance to find new recruits among the best of the best. It is also already a tradition that during the Olympiad the presentations, seminars and lectures, where experts from IT companies share their experiences and knowledge are carried out, as well as introduce young programmers to the current challenges facing the industry. In addition, Olympiad partners carry out applied programming and other industry related projects.

Interest in the KPI-OPEN contest is confirmed by the steady increase in number of participants, expanding to new cities and countries, and increasing media support.
